Description : A Student Information Management Webapp which collects the students information and gives the information when requested, data of students are stored in database this is achieved using advance java concept like servlet, hibernate. This is deployed in local machine using tomcat v9.

SKILLS AND TECH

JAVA

Oops concepts,
Arrays and Strings,
Logical Programming,
Collections and Files,
Exception Handling,
Threads.

JDBC, Hibernate

Classes and Interfaces,
DB connectivity,
CRUD operations,
OMR and Mapping,
Java persistence API,
API and Types.

SQL

DBMS and RDBMS,
DQL,DML,DCL,TCL
and DDL,
Functions and views,
Stored Procedures,
Joins and Subqueries.

MySQL

Database and Tables,
CRUD operations,
Queries on Tables,
Connectivity,
Workbench,.

Web-Technologies

HTML Semantics and Structure,
HTML Tags, CSS Types,
Colors and Alignments,
Cloned Web-pages using HTML and CSS
DOM and BOM, Hoisting, Asynchronous,

Servlet

Good Understanding of Web application and Server.
Servlet , Generic Servlet and Http Servlet.
Http methods such as doPost, doGet. Request
Dispatcher and SendRedirect.
session tracking methods such as cookies,URL
reqriting and Http session

DECLARATION

I hereby declare that the above information is true to the best of my knowledge and belief.
