2019	B.C.A – Govt.First Grade College,Thirthahalli	66.41
2016	PUC –A.R.S.comp pu college Hariharapura	58.83
2014	SSLC – Vishwatheertha Balika High School Kammaradi	63.20

INTERNSHIP AT KODNEST

- Trained in Core Java, Advance Java, SQL, Web Technologies, Python,Manual Testing.

PROJECT- 1

Data Structures Implementation using Swings in Java

- **Technologies used:**Java,Swing(Java GUI toolkit).
- Implemented various data structures, including linked lists, stacks, and queues, using Java Swing, a popular GUI toolkit. Designed and implemented efficient algorithms for data structure operations and integrated them with Swing components to create a user-friendly graphical interface for interacting with data structures. Conducted extensive testing to ensure functionality and performance..

PROJECT- 2

Sign Language Recognition

- **Technologies used** - Python
- Sign Language is mainly used by deaf (hard hearing) and dumb people to exchange information between their own community and with other people.

It is a language where people use their hand gestures to communicate as they can't speak or hear. Sign Language Recognition (SLR) deals with recognizing the hand gestures acquisition and continues till text or speech is generated for corresponding hand gestures.

PROJECT - 3

Crime File Management

- **Technologies used** - java/jsp.
- This system has been proposed keeping in mind the people face during registering complaint at police station. First of all, the entire manual process is time consuming as the complaint has to physically go to the police station numerous times. The same also consumes a hole lot of money and energy.
