

OBJECTIVE

Seeking to leverage fast-paced work ethic with best customer-service to grow as team and to meet high demands.

Having 5 years over all in IT industry with 4.6 years of experience in Robotic Process Automation (AUTOMATION ANYWHERE).

WORK EXPERIENCE

Tek Systems – Senior Software developer (May 2022 – Dec 2022)

- Feasibility and Interaction with LOTUS notes application.
- Automated PDF integrations and Excel operations; Track the defect and follow-up on bug life cycle.
- Supported team on development, reusability components and production deployment with IQVIA client (Domain – Medical Insurance).

First America - Software developer (Sep 2021 – Mar 2022) (Domain – Title Insurance)

- Started working with a2019/a360 Automation anywhere tool along with PDF automation using IQ bot.
- Worked on bot migration.
- Understand and estimate the business criticality and timelines and deliver the proper results.
- Supported the production issues.

Opteamix business solutions - Software developer (August 2018 – Sep 2021) (Domain – Insurance)

- Certified Automation anywhere a2019 professional and v11 professional certification; UI path

Level 1 and orchestrator and also interested to work with other technologies like power automate etc. Got trained on DotNet.

- 3 years of experience working with MAXIMUS: Tier I and II USA Government ERPs support large, mostly federal, government agencies. These vendors support the nuances of government accounting, HR, and procurement. Kicked off with RPA(Majorly worked with Automation anywhere v11) bots
- Team up with the business leads to understand business process.
- Estimate the business requirement and delivered with proper results.
- Worked with the business and technology team to analyze the tasks.

- Provided support for end to end life cycle to automation solution design.
- Configuring new automated processes and objects using core workflow principles that are efficient, well structured, maintainable and easy to understand.
- Solving issues that arise in day to day running of automated processes and providing quick response and solutions as required.
- Expertise on installation and configuration of control room and client.
- Setting up automation processes as per PDD.
- Estimating the effort for the task to accomplish.
- Migrated 5-6 bots from v11 to a360 version of Automation anywhere by improvising the coding standards which would be compatible with latest version.
- Experience with blue prism: Assisted on feasibility study and developing a bot which automates a process which involves data scrapping, excel, DB operations and updates data on legacy desktop application where UI path tool failed in production.

Appzera PVT LTD – Intern and Associate software developer (Feb 2018 – Aug 2018)

- Self-learning on android and have developed trip guide app.
- And also had a chance to develop notification channels for Oreo version release with a client project.
- Worked on frontend Web development using HTML, CSS, Bootstrap as associate developer on client project. And also completed angular JS training.
- I have beginner level of experience with Docker on deploying the projects as container.

KEY SKILLS

- Problem solving
- RPA development – Automation anywhere v11, a360
- HTML,CSS, Bootstrap

QUALIFICATIONS

Bachelor of engineering in CS (9/2013 – 12/2017)

Jyothy institute of technology (affiliated by VTU)

PROJECT DETAILS

1. So far I have worked on 21 bots and more than 14 bots have developed independently.

3 years of experience working with MAXIMUS: Tier I and II USA Government ERPs support large, mostly federal, government agencies. These vendors support the nuances of government accounting, HR, and procurement.

2. Our bots were developed using APIs, UI approach (Desktop and Web applications) for many ERP system. Where vendors support the nuances of government accounting, HR, and procurement.

3. Also have experience in developing VBS, DotNet DLLs for bots use case and efficiency.

4. Have direct interaction with process owner from requirement gathering to presenting demos.

5. Our project execution is done using agile methodology with periodical retrospective and continuous improvement sessions.

6. Have experience in migrating Automation anywhere v11 bots to a2019.

7. I have worked with Sharepoint APIs to fetch the data with Sharepoint office 365 version, LDAP query to perform CRUD operations with Active directory, VB scripts to renders solutions for many use cases where automation anywhere commands are not efficient.

8. With a scope of interest, I have worked with processes using Uiopath, Power automate on Feasibility study, and also on developing the bot.

9. I have been working as freelancer on RPA usecases obtained from a firm. And pursuing master a360 certification to know more about the latest commands in order to cover more usecases.

Sprint cycle and agile methodology followed across team -

1. As per agile software development methodologies centered round the idea of iterative development, where requirements and solutions evolve through collaboration between self-organizing cross-functional teams. And ultimately deliver incrementally instead of all at once.

2. Our team also works according to scrum which is subset of agile which is useful in many aspects to all stakeholders as mentioned below -

- * Increase the quality of the deliverables
- * Cope well with change
- * Better estimates while spending less time creating them
- * Be more in control of the project schedule and state.

And also have been part of in-house scrum and sprint training which involves all the different stages of sprint -

*Sprint planning | *Daily scrum meeting | *Support and unblock the impediments | *Sprint review | *Sprint retrospective | *Backlog grooming.

AREA OF INTERESTS

- Data Science.

HOBBIES

- Travelling and Bike riding
- Badminton
- Cricket
- Contribute my time in CSR activities and foundation like Right to Live etc

ACHIEVEMENTS

- "Spot light award" from opteamix for project delivery, coding standards, overall performance and appreciation received from clients.
