Asna. A

Mobile No: +91-8050510261

Email ID: asna.azees07@gmail.com

Professional Expertise Summary:

- Currently working as Test Engineer, Accenture Solutions
since 16-April-2018 till now
- Expertise in Manual Testing and Mobile Application Testing
- Well-versed with all stages of Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC) and Bug Life Cycle (BLC).
- Extensive work experience on Smoke Testing, Regression Testing.
- Designed the Test cases, Test Scenarios by using Software Requirement Specifications.
- Involved in Bug Reporting through Bugzilla, JIRA, Phabricator and validation of resolved bugs.
- Able to work collaboratively with testers, developers, and other team members in testing complex projects and in the overall enhancement of software product quality.
- Good Exposure in Automation testing selenium .
- Good exposure in java and J2EE .

Education Details:

- B.E Computer Science And Engineering from AMSEC, Namakkal, Tamilnadu.
- 12th from G.H.S.S Cheeral, Kerala.
- 10th Standard from G.M.H.S.S Cheeral, Kerala.

Skilled On :

- Core java, J2EE & SQL
- Selenium
- Manual testing
- Computer Knowledge: Microsoft Excel, Microsoft Powerpoint, Microsoft Word
- Tools : JIRA, Sirius, Asana.

Project # 1

Client : **UBER Technologies**
Duration : **Jan 2019 – till date**
Role : **Team Member**
Environment : **Manual Testing, Jira, Phabricator and Uber internal tools.**

Description: Uber Technologies is an American multinational transportation network company (TNC) offering services that include peer-to-peer ridesharing, ride service hailing, food delivery, and a bicycle-sharing system. The company is based in San Francisco and has operations in 785 metropolitan areas worldwide. I have worked on a GSS (Global scaled solutions) project in Uber. In my project I have worked on both rider and driver apps.

Responsibilities:

- Understanding Requirement Specifications and Design Documents of the application.
- Performed Regression Testing for every modification made in the application and new builds using Selenium Web Driver.
- Conducting Data driven testing, cross browser testing and parallel test execution
- Finding the Bugs and Reporting of the Bugs in Bug Report (Bugzilla Tool)
- Verified the fixes and closed bugs during the regression test cycle.
- Preparing test cases and executing test cases.
- Analyzing test results and involved in defect reporting using Bugzilla.
- Performing Regression testing on driver test cases.
- Testing 95+ features across Rider,Driver,Uber Lite and Fleet.
- Performing Exploratory testing and Accessibility testing.
- Performing Localization testing.

Project # 2

Project Name	: DemoEMS
Technology	: Core Java, Java Script, jdbc, Servlet, jsp,mysql,html,css etc.
Framework	: ORM (Hibernate), Spring
Architecture Type	: MVC
Build Tool	: ANT
Team Size	: 6
Process Type	: Agile scrum process
Duration	: 4 months

Description :

It is a web based application designed and developed to perform marketing in an efficient manner. It helps to organize and automate the organization's sales process thus letting it focus on more important activities required to accelerate growth. It gives as a combined overview of enquiries across various details in a single click, Reminds as for follow-up with prospects. It used to analyze products and regions that attract more sales, marketing Campaigns or source, that generates more enquiries etc.

Certification Courses :

1. Completed software development and testing course from Testing campus .
2. Completed junior software developer course under PMKVY in Rooman Technology

Declaration :

I hereby declare that the information furnished above is true to the best of my knowledge.
